Keyhole Security carries a complete range of Vidilanz Products

KEYHOLE SECURITY THE COMPANY
Security House, 39-41 Vale Road, Portslade, Brighton,

Tried and tested ...

Keyhole Security, established 1948, is a long term security supplier to both the domestic and commercial markets, and now local government and police forces.

Knowing that we had the cutting edge technology in wireless CCTV, we approached Brighton & Hove City Council Environmental Team.

A recent bad experience of purchasing CCTV that was ineffectual rightly made them reticent over our claims. After all, having spent a substantial amount of money, why would they do it again.

But we did finally agree a feasibility study with them. So a set of cameras were deployed in a well patronised fly-tipping lane. During the first two

months of the study there were minor incidents. Month three saw two major incidents, which enabled us to bag and tag the evidence after copying the files and forwarding to the customer.

Following these successes, we were asked to help with the national accredited clean-up operation of Tanner Park in Brighton, various graffiti and traveller sites with these cameras.

Brighton and Hove are now applying for funding to deploy more cameras.

This groundbreaking system is now starting to be rolled out across the country... and this is where we need your help.

Date, stamp & location
Every image is date stamped with an encryption and digital watermark

Person Identification
Sharp and clear, no doubt identification

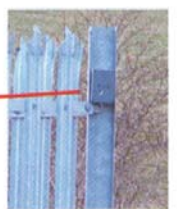

Night Identification
Infrared technology employed makes it possible to record night Fly-Tipping

Comprehensive product training...

The skilled people at Keyhole will lead you and your team through a specially designed course that will equip you with the skills necessary to identify Fly-Tippers and help clean up our environment.

- Using the art of camouflage
- Use of the Vidilanz camera
- Setting up the camera in the field
- Hands-on activity

Participants should bring clothing and boots as this is a real life training course, not just theory.
